SKILLS

Languages & CS Fundamentals: Python | JavaScript | C++ | Java | MySQL | OOP | Algorithms | Data Structures

Web & Backend: FastAPI | Flask | Node.js | React | SQLAlchemy | PostgreSQL | Redis | Docker

AI & LLM Tools: Debugging AI-Generated Code | Prompting & Guiding LLM Coding Assistants

Cloud & Dev Tools: GitHub | APIs | Containers | Documentation | Testing & Debugging

Additional Skills: Code Reviews | Cross-Team Communication | Agile Practices | Linux | CI/CD Familiar

EXPERIENCE

Software Developer

Feb. 2024 - Current

DataAnnotation

- Conducted over 50 code reviews and debug code for AI-generated code across different programming languages, including C++, Python, and JavaScript, making necessary revisions as required.
- Reviewed and corrected AI-generated code based on provided prompts to ensure functionality and accuracy.
- Analyzed code output for syntax errors, bugs, and logic flaws, making necessary adjustments to meet project specifications.

Software Intern

May. 2023 - Aug. 2023

Southern California Edison | Rosemead, CA

- Reduced Analyst research time by 30% through development of a geospatial database using Python and Pandas.
- Developed a visual representation program for analyzing geospatial data in support of SCE's Pathway 2045 project.
- Produced comprehensive application documentation to ensure straightforward installation and user support.

Ride Operator

July. 2018 - Dec. 2019

Knott's Berry Farm | Buena Park, CA

- Debrief and consult daily procedures with team leaders and management to enhance operational efficiency.
- Enhanced operational efficiency through daily team coordination, serving 20% more guests.

PERSONAL & SCHOOL PROJECTS

Developed a full-stack web application in a team using FastAPI and React for AI-driven insights and data visualization. Integrated Gemini 1.5 Flash for dataset analysis and implemented Redis caching for optimized performance. Technology stack includes Python, FastAPI, React, SQLAlchemy, Redis, PostgreSQL, Alembic, Gemini API, and Docker.

Built a full-stack movie rating web app with Flask, SQLAlchemy, and PostgreSQL. Integrated JWT-based authentication, role-based access, and file handling. Utilized Flask-Migrate, Flask-CORS, and psycopg2 for migrations and database interaction.

Developed and deployed a bug tracking web application with RESTful APIs, enabling users to create, manage, and prioritize issues; implemented database-backed CRUD operations and status tracking.

EDUCATION

California State University, Fullerton

Dec. 2024

Bachelor of Science in Computer Science - GPA 3.72
